移行期の仕事 フランスと日本において

人口動態・環境・デジタルの移行が
職場の変化に影響を与えている

This symposium is organised to celebrate the 40th anniversary of academic exchanges between Toyo University (Japan) and the University of Strasbourg (Unistra). It will be held in Strasbourg on 2 and 3 October 2025. A second event will be organised by Toyo University during the week of 10 November 2025, with the presence and contributions of Unistra researchers and teaching staff.

This double celebration marks the importance of this cooperation for both universities. For Unistra, the agreement with Toyo University is the first to be signed with a Japanese university.

Scientific exchanges between Toyo University and the University of Strasbourg go back a long way and their quality has led to the signing of successive agreements between the two institutions. This symposium should help to strengthen this cooperation and encourage the emergence of new research projects.

The theme of the symposium is "Work in transition in France and Japan", which refers to the challenges that demographic, environmental and digital changes pose for the world of work.

The conferences will be multidisciplinary, bringing together specialists from both universities in the fields of health, economics, social sciences, environmental sciences, artificial intelligence and chemistry. It will there-

fore provide an overview of the problem and the various observations and solutions coming from different scientific fields.

Through lectures, a round table and visits, the discussions will serve not only to highlight the importance of the collaborations developed between the two institutions and the many partnerships now established, but also, and above all, to consolidate them and open up new prospects for their development. The lectures and round tables will be open to Unistra teachers, researchers and doctoral students, as well as to French and foreign universities (particularly in the Upper Rhine region) interested in the subject. The colloquium will also be open to non-academics interested in the issue of changes in work: public decision-makers, industrialists, associations and social partners.

The theme of working in the medicine of the future will be the subject of two visits, IRCAD and Nextmed.

02

Opening remarks

- 9H00-10H30**

SESSION 1 *AI, innovation and transitions*

- 10H30-11H00**

Coffee break and group photo

11H30-12H15

SESSION 2 *Nanosciences and health in transitions*

- **Alberto Bianco**, University of Strasbourg
- **Tatsuro Goda**, Toyo University
- **Takeshita Kazutaka**, Toyo University

12H30-13H45

Lunch

14H15-17H30

SESSION 3 *Visit Session (on registration)*03ND

9H00-10H30

SESSION 4 *Gender, work and public policies*

- 10H30-11H

Coffee break

11H00-12H15

SESSION 5 *Entrepreneurship*

- 12H30-13H45

Lunch

- Restaurant "le 32"

14H00-15H15

SESSION 6 *Privacy and democracy in digital and environmental transitions*

- **Toshiya Aramaki**, Toyo University
- **Emmanuel Droit**, University of Strasbourg

15H15-16H00

FINAL SPEECH *Molecular machines and motors: a historical perspective*

- **Prof. Jean-Pierre Sauvage**, Emeritus Professor, University of Strasbourg, Nobel Prize in Chemistry 2016

16H00-16H15

Concluding remarks

- **Rémi Barillon**, Vice President for Research, Doctoral training and Open Science, University of Strasbourg
- **Toshiya Aramaki**, Vice President for International Affairs, Toyo University
